

The New Conxxus TV: YourTV Green

YourTV Green is Conxxus' new TV streaming service that delivers your news, shows, and movies over an internet connection. YourTV Green lets you watch live or on-demand across your TV, tablet, or phone. The new streaming service continues to offer many of the features of a tradition cable box such as VOD (Video on Demand), DVR capabilities, channel guides, and more, just with a few key differences.

Why YourTV Green?

Change is not always easy and no one wants another hassle in their daily lives. While we understand this challenge, technology is constantly evolving and we must keep up so that we aren't left behind. Much like VCRs were replaced by DVD and Blu-ray players, change is underway as cable boxes are being replaced by streaming devices. Streaming apps are the new, more efficient way to deliver video content. At Conxxus, we must follow suit with the TV industry and adopt this technology to deliver programming. As technology advances daily, we strive to keep our equipment up to date which allows you, the customer, to enjoy less interruptions.

What is YourTV Green?

- A streaming application like Netflix, Hulu, Amazon Prime, and others
- Is delivered over a Conxxus internet connection (streaming does not count toward any usage, as we do not have a limit to usage or bandwidth)
- Does not use a cable box but a streaming device (i.e. Pontis box, FireStick, RokuStick, or smartTV system)
- Allows you to watch TV on compatible phones, tablets, and other streaming devices
- Delivers all content in High Definition (HD)
- The app is available on GooglePlay, Apple Store, Amazon, and Roku brands

Why does YourTV Green require a Conxxus internet connection?

YourTV Green requires a connection to our core network, which is the data source behind the service. Unlike other streaming apps, streaming YourTV Green at home pulls you from our local cache servers to give you the quickest playback possible. This means less buffering and loading times like you would get with apps like Hulu and Netflix.

Why does YourTV Green only play on a Conxxus internet connection?

Currently, YourTV Green requires a connection to the core network which is a cloud base and fed back to our 3rd party vendor. Once the required licensing is completed, we will be able to offer the same TV services that you love on the Conxxus fiber network outside of our network. This means that soon you will be able to log into YourTV Green anywhere in the world to watch your favorite local

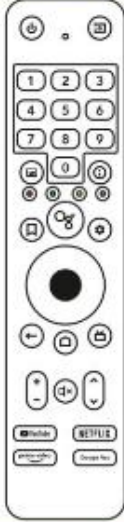

channels, VOD, and recordings while you are either traveling, on vacation, or even in a business meeting.

When can we expect the YourTV Green Anywhere to become available?

We are working diligently with our vendor to make sure we can offer this our customers as soon as possible. We are hoping to have it available by the end of 2023.

What streaming devices are compatible?

If you do not have a smartTV or have a TV that is not compatible, you will need a streaming device. Use the table below to decide which one is the best fit for you. PONTIS boxes are available to rent from Conxxus for \$10 per month and \$5 for each additional box.

Device	Apple TV	PONTIS	Amazon Fire TV Cube/ Firestick
Best for...	Apple users and tech-savvy viewers who will use their streaming device to access multiple apps	Traditional TV viewers who want as minimal change as possible to their television-watching experience	Android and Amazon smart-users who prefer Samsung and will use their streaming device to access multiple apps
App Store	Apple Store	Google Play store	Amazon App Store
Remote Navigational Design			

What else do I need to use YourTV Green?

You will need a Gmail email address to be able to download the app. If you don't already have one, you can create a new account by visiting www.accounts.google.com/signup. Already have a Gmail address? You're all set to go!
